

I am asking that you do not get rid of Air 1 radio station and replace it with an LPFM. Air 1 is an awesome asset to me it is the only radio station I listen to. I love the fact that as I travel I am able to find it across the country also. We are a military family and the last station we were at we didn't have it so we listened to it over the internet. I know many people in my community that listen to Air 1 and would be very displeased if it were to be removed. I think that the service of Air 1 is in the public interest to be kept as so many are blessed by their service. They truly are an outreach to people not only those that are Christians already but to those who are seeking something better in their lives. I have even heard testimonies of people who have chosen not to commit suicide because they heard Air 1. That is saving lives right there! Please don't replace them with an LPFM station.
